WHY THIS MATTERS NOW

MAS puts AI with the board

Its proposed AI risk guidelines say the board and senior management play a key role in overseeing AI risk, at every institution, sized to its risk.

Directors have their own guide

The Singapore Institute of Directors published an AI Guide for Boards, with IMDA, Microsoft and OpenAI, to help directors oversee AI.

Digital assets add a layer

Firms that hold, move or service digital assets carry custody, on-chain and financial-crime exposure on top of the AI risk.
