COURSE OUTLINE

WE WANT TO USE AI WELL, AND SAFELY.

AI Security Awareness for Staff

A short whole-company session on the AI-enabled attacks staff now face, from deepfake voice to tailored phishing, and the data never to paste into a tool.

FORMAT	LENGTH	BUILT FOR
In-house workshop or all-hands session	60–90 minutes	Financial Services

WHAT YOUR TEAM WALKS AWAY WITH

Spot AI-powered scams, deepfakes and data leaks, and use AI tools without putting the company at risk.

THE SESSION, STEP BY STEP

1. How attackers now use AI
2. Spotting a fake early
3. Verify before you act
4. Safe and unsafe AI use
5. What never to share
6. When something looks wrong
7. Your safe-use guide

A 60–90 minute session for the whole company.

YOU KEEP

- **One-page safe-use guide**, for every employee, no technical background needed
- **Do and don't card**, client-facing version: the red lines on one page
- **Scenario quiz**, client-facing version: closes the session
- **Completion & attestation record**, client-facing version: a record of who was trained

WHO IT'S FOR

- Every employee
- Client-facing teams (optional version)

WHY THIS MATTERS NOW

Fakes are cheap to make

AI has made fake emails, cloned voices and deepfake video cheap and fast to produce.

A cheap gap to close

A short awareness session is one of the cheapest ways to close both gaps across the whole company.

One paste can leak data

Well-meaning employees can leak sensitive information just by pasting it into the wrong tool.

Bring this session to your team.

Tell us your team and what you want them to walk away with. We'll come back with a scoped session and dates.
